DBIOMED

THE
ADVANTAGE

Innovation Starts Here.

In the dynamic field of scientific research, unforeseen circumstances can arise at any moment. At DBIOMED, we understand that in the fast-paced world of scientific research, time is of the essence and the pace of scientific discovery waits for no one. Whether it's a last-minute supply shortage or a sudden experimental breakthrough requiring new equipment, we ensure you get whatever you need, when needed.

We are your partner in creating a more sustainable future for scientific research.

DBIOMED helps make exceptional lab days the norm, not the exception. At DBIOMED, we understand the role of high-quality, sustainable lab equipment in your daily research. We proudly feature an extensive range of products from industry leaders such as **Labcon**, **Medicom**, **CellTreat**, **IKA**, and more. These curated offerings are designed to facilitate your laboratory operations' **efficiency, accuracy, and environmental responsibility.**

No matter what research challenges lie ahead, DBIOMED's solutions will support your scientific endeavors, enhance your lab's performance, and help you feel great about your environmental impact.

Choose DBIOMED, and transform every day into an opportunity for ground-breaking, sustainable science.

THE DBIOMED ADVANTAGE

RELIABILITY

- Consistent quality control and testing certifications
- Efficient supply chain and fastest shipping in industry with vast stock availability
- Flexibility in order fulfillment and courier selection
- Long-term Partnerships with full team assistance

INNOVATION

- Close collaboration with manufacturers
- Continuously introducing new eco-friendly and complex lab solutions
- Future-oriented product development & workflow problem solving to meet customer needs

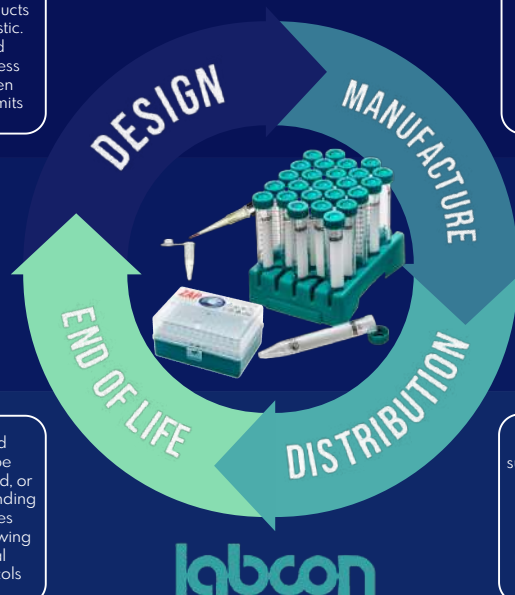

SUSTAINABILITY

- Sourcing eco-friendly products like our primary manufacturer that prioritize sustainability
- Offer recycling programs and aim to reduce labs overall impact with workflow/product changes
- Implement eco-conscious practices company wide.

Design reusable, refillable, and recyclable products that use less plastic. More recycled materials, and less packaging when application permits

SUSTAINABILITY LIFECYCLE

Lower emissions by molding, assembling and efficiently packing product with efficient energy practices and renewable energy sources for > 95%

Packaging and products can be recycled, landfilled, or incinerated depending on local facilities. Encourages following organizational recycling protocols

Introduce new, sustainable alternatives to traditional lab consumables to distributors and consolidate orders to minimize impact from transport

ENVIRONMENTALLY PREFERRED

Nearly 600 ACT Labels!

The Act label is a virtual "eco-nutrition" label for laboratory products that inform consumers about how products rate in various sustainability-related categories. Labcon's ACT-labelled products were independently audited by Sustainability Made Simple, verified by My Green Lab, and confirmed to have an industry-leading low environmental impact!

Nearly 600 Labcon products have gone through the "green-screen" ACT assessment process and their sustainability can be compared against other brands such as Eppendorf and Rainin on the ACT database.

View and compare Labcon's ACT labels.

WHY CHOOSE DBIOMED FOR YOUR LAB SUPPLIES ?

Medcom
Pride in Protection

Energy-Efficient Production

Our state-of-the-art all-electric injection molding machines significantly reduce energy consumption—up to 60% less than traditional hydraulic machines.

Long-term Partnerships

Demonstrating a history of long-standing relationships with manufacturers and customers, indicating trustworthiness and consistency.

Compliance Made Easy

We're dedicated to providing eco-friendly solutions for your lab, reducing environmental impact without compromising on quality.

Competitive Pricing

By specializing in sustainable lab products, we offer cost-effective solutions without hidden environmental costs.

WHY CHOOSE DBIOMED ?

PRODUCT MANUFACTURING AND QUALITY

Our commitment to being the best

At DBIOMED, quality is not just a goal—it's our standard. We understand that the reliability of your research depends on the consistency and performance of your lab supplies. That's why we've implemented a rigorous quality assurance process that ensures every product leaving our doors meets the quality you expect, every time

MANUFACTURING & SUSTAINABILITY

Labcon focuses on maintaining a streamlined, localized production process. Over 90% of our products are molded, assembled, packaged, and distributed from the centralized Petaluma facility.

At DBIOMED, we believe that when you use our products—be it pipet tips, tubes, PCR plates, or any other lab essentials—you should be able to focus on your research.

Our unwavering commitment to quality means you can trust in the consistency and performance of every product we provide

TESTING

Our Testing & Protocols

Not all products have each process or method that applies. Refer to product specifications to determine if one of these protocols apply

Compliance

Conformity to our audited procedures and protocols including ISO 9001/13167

Biological Testing

Lab based testing using biological testing tools and procedures. labcon.com/testing.html

Validated Sterility

In house E-beam sterilization ensures SAL of 10⁻⁶. Verified sterile for diagnostic, clinical and resarch applications

Conformity & Regulations

Audited conformity to external assessment and regulatory agencies like FDA, CE and ISO.

DBIOMED

THINK SCIENCE

FREQUENTLY ASKED QUESTIONS

Are your products sterile?

Our sterile products are sterilized via E-beam sterilization methods to a 10⁻⁶ Sterility Assurance Level (SAL) which is standard for clinical, diagnostic, and research applications.

What materials is your plasticware made from?

Our products are primarily made from Medical Class IV high-quality polypropylene resin.

Are your products compatible with autoclaving?

Many of our polypropylene products are autoclavable. Please check the specifications for each product as autoclave compatibility can vary.

How soon will we receive product?

All orders are shipped from Canada, which allows us to ship **next-day** and same week orders. Out of stock products can be delivered as soon as 2 weeks.

What if I want to place a website order?

For website orders and international customers, we encourage you to make an account, then speak to us about qualifying you for exclusive website pricing. You will have access to your own account with pricing specific to you.

How do you ensure the quality of your products?

We have a rigorous quality control process, including regular testing and inspections. Our manufacturing facilities adhere to ISO standards to ensure consistent, high-quality products.

Are your products DNase/RNase free?

All our products are certified DNase/RNase free, as well as hDNA, endotoxins, protease, and ATP FREE

How exactly are your products sustainable?

Labcon takes innovative approaches to design, manufacturing, distribution, end of life and waste reduction. These initiatives are verified by a third party called ACT - My Green Lab

What are your payment terms?

We accept various methods of payment including credit cards, bank transfers or purchase orders on standard NET 30 Terms

What is your return policy?

We accept no question returns within 30 days of the order date provided the item is in the original packaging. For opened packages a credit, can be used towards future purchases

X-Large	DB-OPXL-NI	Ocean Pacific Ninja Nitrile Glove Black XL, 200/Box

BENEFITS OF NITRILE GLOVES:

Comfortable fit

Nitrile gloves conform to hands, providing a snug, comfortable fit to reduce hand fatigue.

Optimal stretch

Nitrile gloves offer optimal flexibility, making them ideal for procedures that require manual dexterity and tactile sensitivity.

Latex free

Nitrile gloves are not made with natural rubber latex, so they are safe for professionals and patients with a latex allergy or sensitivity.
